ABSTRACT:

PROBLEM TO BE SOLVED: To provide a digital camera with which everybody can
enjoy digital photographs at a low cost.

SOLUTION: A user can buy a digital camera, for example, at a selling shop 300
such as convenience store. After the user photographed desired photographs,
the user returns the camera to the selling shop 300. The camera returned to
the shop 300 is recovered to a prescribed collecting and delivering center 350
and the photographed data of the camera are transmitted to a picture station
device 50 via a transmitting device in that center. Photographed pictures are
stored in a hard disk in the picture station device 50. The user 200 browses
or downloads the pictures photographed by the camera by making access to the
picture station device 50 via the Internet by using a user's personal computer.
